👤 PROFILE

Motivated Computer Engineering graduate actively seeking a job opportunity, with hands-on experience in hardware maintenance, embedded systems labs, and technical support.

🌐 LANGUAGES

Arabic — Native/Bilingual

English — Fluent

🧩 CLUBS

Developers Club- Member

University of Balamand

08/2021 – 12/2025 | Al Koura, Lebanon

- Actively participated in technical discussions, workshops, and projects to sharpen programming skills and stay current with software development trends

🎓 EDUCATION

Computer Engineering

University of Balamand

08/2021 – 12/2025 | Al Koura, Lebanon

🛠️ PROFESSIONAL EXPERIENCE

IT and Customer Support Specialist

Al Aref for Ceramics

09/2025 – Present | Tripoli, Lebanon

- Managed and maintained IT systems related to inventory and sales of tiles and ceramics
- Provided technical support for internal systems and assisted customers with product-related inquiries

Intern

CompuCamp

06/2025 – 09/2025 | Tripoli, Lebanon

- Performed hardware diagnostics, maintenance, and repair of computers and printers
- Assisted with troubleshooting technical issues and providing IT support

Lab Assistant – Embedded Systems Course

University of Balamand

01/2024 – 05/2024 | Al Koura, Lebanon

- Assisted students during lab sessions focused on Embedded Systems using SystemVerilog
- Collaborated with the course instructor to maintain a smooth and effective lab environment

📁 ACADEMIC PROJECTS

Senior Project

Smart Traffic Light

08/2024 – 05/2025

- Developed a camera-based system to monitor roads in real time
- Used YOLO algorithm for image analysis on a microprocessor, enabling object detection and automated command execution.
- Integrated computer vision, machine learning, and embedded systems.

Artificial Intelligence for Engineers Project

AI Gym Coach (Pose Assessment)

01/2025 – 05/2025

- Developed an AI model based on YOLOv5 to analyze bodybuilder's poses in gym training images
- Implemented code that detects body keypoints and evaluates whether the exercise form is correct or incorrect
- Built and tested a full computer-vision pipeline using Python, applying course concepts in machine learning and reasoning

TECHNICAL COMPETENCIES

Programming Languages: Python, Java, C, C++, Assembly

Software & Tools: Quartus, Logisim, Zelio, VS Code, Proteus, MPLAB, LabVIEW, LVVL, MATLAB, AutoCAD, and Microsoft Office Suite (Word, Excel, PowerPoint)

CERTIFICATES

Networking Fundamentals & Network Access Pack Publishing (via Coursera)

Fall 2025

- Fundamentals of computer networking, network access, and basic network concepts • Covered networking basics, access technologies, and foundational IT networking skills

IT Essentials (A+) – Cisco Networking Academy

Fall 2024

- Covered essential IT skills, including hardware and software troubleshooting, computer assembly and disassembly, and basic cybersecurity principles.

Certificate of Training

Summer 2023

- Leadership
- Critical Thinking
- Time Management
- The Art of Public Speaking
